

## WIRE MAINTENANCE AGREEMENT

Every Customer has the option of installing their own inside wire or having the installation completed by the telephone company or a contractor.

In compliance with FCC rulings, effective January 1, 1987, inside wire was deregulated. This means that you, the customer, are responsible for maintenance of the telephone wiring and jacks inside your home or business, or you may subscribe to a maintenance program. Customers who elect to maintain their own inside wire will be charged on a time and material basis for any repair work done by their telephone company. The following are the types of vendors who sell inside wire and jacks:

- Local hardware stores
- National chain specialty electronic stores
- National chain hardware stores
- Cellular and Mobile telephone equipment suppliers
- National chain discount stores
- Electrical contractors

We offer a Maintenance Plan to maintain the wiring in your home. For a monthly charge we will maintain the wiring in your home for computer and telephone equipment. Please contact one of our Customer Service Representatives for information and pricing. This plan does not include electrical wiring.
